

## COVID19

Welcome to COVID19 from sfarrand.com. COVID19 is a Windows 64-bit desktop application dedicated to rendering the Johns Hopkins Coronavirus Resource Center data. It is based on the WinApp engine and handles the latest sophisticated web technology such as JavaScript and HTML5.

### Release Revisions

- v0.33: Initial release.

## Download COVID19

COVID19 has two essential components to render pages on your Windows 10 PC:

1. The COVID19 program – covid19.exe
2. Chromium Rendering Engine - MicrosoftEdgeWebView2RuntimeInstallerX64.exe

Download the single setup program ([setup\\_covid19.exe](#)) to install both components on your Windows 10 PC. If you have previously installed the Chromium rendering engine (MicrosoftEdgeWebView2RuntimeInstallerX64.exe) you do not need to reinstall it. You can skip this portion of the setup routine by unchecking the box when asked. Note that the MicrosoftEdgeWebView2RuntimeInstallerX64.exe will not interfere or influence your existing Edge Browser or Chrome Browser.

## Donation

If you find value in our WinApp software, your support and contributions will enable us to continue improve them. Your donation will be much appreciated.
